No. 208/2017 Coll., stipulating the scope of technical parameters for equipment, by which gambling games are operated, of requirements for protection and retention of game and financial data and their technical parameters (hereinafter referred to as the "Decree") and which came into effect on 14 July 2017, the provision of Section 3 of the Decree regulates decisive requirements for the equipment and the method of how a gambling operator handles the game and financial data stored therein. The equipment and method of data handling must comply with the technical requirements for the information security management system, which are set out in technical standard ČSN ISO/IEC 27001:2014 Information Technology - Security Techniques - Information Security Management Systems - Requirements, unless otherwise provided by the Gambling Act or this Decree. These requirements can be summarized as requirements of integrity, confidentiality and data availability, and the Authorized Person is obliged to check today if they are met.
