Case No.: SPCSS-02008/2019

RESPONSE TO REQUEST FOR INFORMATION

State Treasury Centre for Shared Services
with its registered office at Na Vápence 915/14, 130 00 Prague 3,
registered in the Commercial Register maintained by the Municipal Court in Prague under file No. A 76922
Company registration number: 03630919
VAT identification number: CZ03630919
Data Box ID: ag5uunk
represented by: Mgr. Jakub Richter, First Deputy CEO

State Treasury Centre for Shared Services (hereinafter referred to as "STCSS") received a request for information on 28 May 2019 pursuant to Act No. 106/1999 Coll., On Free Access to Information, as amended (hereinafter referred to as the "Act"), from the **Institute for Gambling Regulation**, company registration number: 07542232, with its registered office at Opletalova 921/6, 110 00 Prague, represented by director of the association, **Mgr. Jan Řehola**.

In connection with this request, STCSS submits the following information within the deadline state by the law:

Question No.1:

What hardware components or other technical solutions will be used by the STCSS to provide the automated output under Decree No. 10/2019 Coll., On the Method of Reporting and Sending Information and Data Transmission by Gambling Operators, the Scope of the Transmitted Data and Other Technical Parameters of the Data Transmission (hereinafter referred to as the "Reporting Decree")?

STCSS Information Submitted to Question No.1:

STCSS will use hardware tools of shared platforms of STCSS, built and developed within the ICT strategy of the MoF resort, purchased through the existing framework contracts of STCSS, these platforms will specifically be virtualized platforms x86 and IBM pSeries with Linux operating system.

Question No.2:
What software solution will be used by the STCSS to provide the automated output under the Reporting Decree?

STCSS Information Submitted to Question No.2:

STCSS will use the SWC solution, which is based on open source and freely available SW products, especially PostgreSQL, Java, .NET and specialized applications created in cooperation with service providers, i.e. company CGI IT Czech Republic s.r.o. (based on the Contract on Provision of the "Communication Interface" function of the AISG Analytical Module during the implementation of the "AISG Analytical Module" project published in the Contract Register under the following link: https://smlouvy.gov.cz/smlouva/7414095) and company Profinit EU, s.r.o (based on the Framework Contract on Service Provision (DWH Development Team) published in the Contract Register under the following link: https://smlouvy.gov.cz/smlouva/8274035).

Question No.3:

Which technical measures will be taken by the STCSS in order to prevent or eliminate outage when downloading data packages from the URL of an operator by the Customs Administration of the Czech Republic?

STCSS Information Submitted to Question No.3:

The SW solution uses a fully redundant data centre environment and the STCSS network infrastructures and its architecture follows the principles of HA (i.e. high availability) and DR (i.e. disaster recovery).

Question No.4:

Which technical measures will be taken by the STCSS in order to prevent or eliminate the outage of the web server of the Customs Administration of the Czech Republic for the download of confirmation packages by an operator?

STCSS Information Submitted to Question No.4:

See STCSS information Submitted to Question No.3.
