

Overview of The Impacts of The Decree on Outcome Documents:

- **Expert assessment identifier**
  Section 3 par. 4 - change of the creation of the expert assessment identifier - its parts are newly separated by a hyphen instead of a dash (as a result, Section 5 amending the decimal code is also deleted)

- **Reference to other expert assessments**
  Section 7 par. 4 - the condition that the expert assessment referred to is not older than 3 years is deleted. The condition that such an assessment is valid at the time of reference is maintained.

- **Registration mark**
  Section 9 par. 5 - the font on the registration mark is sufficient in size 2 mm instead of the original 3 mm

- **Repository of authorized persons**
  Section 11 par. 3 - two possible accesses to data allocation:
  i. general access for the MoF and the GFD (handed over immediately after the authorization decision comes into force); or
  ii. to specific official persons of the MoF and the GFD
  (The authorized person shall ask the administrative body to disclose the list of these persons immediately after the authorization decision comes into force, and after receiving it, they shall submit newly within 5 working days.)
  (Municipalities will apply for the access through the Ministry of Finance)

  Section 15 par. 3
  - **The authorized person has 6 months to adapt to the new requirements for the repository, i.e., by 30 June 2022.** Until then, they use they original repository, in which they store "in the old way" also the new document, the report on the changes assessment. As soon as the new repository starts to be used, they must **retrospectively load there the issued documents, which shall already meet the conditions for storing under the new Decree** (Sections 12 and 13).
  - The deadline for granting the access to the MoF or the GFD shall start on the day of the repository operation.

- **Conditions of the decision on the authorization of authorized persons vs. obligations of the decree**
  Section 14 - stipulates:
  i. priority application of the conditions specified in the decision on the authorization issued before 1 January 2022 over the new decree
  ii. priority application of the Decree over certain

conditions of the authorization (e.g., the outcome document in a foreign language shall be provided with the officially certified translation into the Czech language or server designation), because the Decree is not as strict with regard to these conditions. It will no longer be necessary to comply with these conditions of the authorization.

- **Expert assessments issued before 1 January 2022**

  Section 15 par. 1 and 5 - expert assessments issued by the end of this year, or no later than 28 February 2022 (if the assessment process began by the end of the year) remain valid in the "old age way", **however, their updates must meet the new conditions of the Decree**. The exception is the first update, but only for part of the new requirements (Section 2, Annex 2), namely the obligation to specify the changes that occur in the update.

- **Registration mark**

  Section 16 - registration marks produced before 1 January 2022 will remain valid and may not meet the new requirements, in addition to the legibility of the text on the mark and those requirements specified in the authorization decision, that is for a period of 1 year.

- **The Certificate of Operability will now be referred to only as "OP" instead of "OOP"**

- **Table items in expert assessments (Annex No. 2)**
  - Added "Game version" column
  - If a table does not fit on the page, it can appear in the text in a modified format, e.g., rotated.
